Sebastian Netzker

Jr. Front-End Developer

—

About Me

I started as a Biotech student, fell in love with software development and now have a portfolio of projects as a front-end developer. I am aware that I am not a computer science student, so I did not only learn the technologies I have in my resume but also have experience building real applications with all of them.

When I started my career in Biotechnology, I realized that working in a laboratory is not for me. In this time I discovered software development. I started with a simple online course and then decided to learn professionally with Senior developers as coaches and build projects alone and in groups (Developer Akademie).

I love to build applications and want to become part of your team.

Tech Stack:

- JavaScript
- HTML, CSS, Bootstrap
- Git, SCRUM

—

Skills

- **Doing the hard work:** I know that I do not have the standard developer CV. Over the last months I worked full time and every day after coming home went to my computer to code. I work hard. I do not complain.
- **Building Applications with JavaScript:** I built Web-Applications, Jump-and-Run-Games and Responsive Websites with JavaScript.
- **Experience building Software in Teams:** During learning coding, I did several group projects with other students from Germany and Austria, where I learnt how to develop a software project in a team. We organize ourselves indepently in the team, where we created individual taks and then distributed them evenly. To solve problems that arise and to meet the deadline, we had to communicate regularly.

- **Sense of Responsibility:** Through my job at the gas station I was able to develop a high sense of responsibility. In the early morning or the late afternoon, I was solely responsible for the entire business. This includes keeping the shop & business safe.

Professional Experience

Sprint - Energie Cottbus Fan Tankstelle / administration & retail
SEP 2019 - PRESENT, COTTBUS

- Responsible for the operation & safety of the entire gas station in the early morning and late afternoon
- Serving 300 customers every day

Education

Developer Akademie / Front-End Developer Ausbildung JavaScript Development Training
MAY 2020 - MARCH 2021, MUNICH

Project based coding academy. Main Stack: JavaScript

Portfolio: www.sebastian-netzker.com

Extensive Coding School, Learning Front-End Development, Coding, Agile Project Management and building several projects in teams and alone.

BTU Cottbus - Senftenberg / without a Degree
OCT 2017 - SEP 2019, SENFTENBERG

- Studying Biotechnology (left without degree in order to learn coding)

Theodor Fontane Gesamtschule Cottbus / Abitur (2,6)
AUG 2014 - JUNE 2017, COTTBUS

Languages

German: native

English: fluent
